

General Laborer

Our company:

Sorption Technologies GmbH has developed a new type of adsorption chiller for waste heat recovery in industrial applications. Currently, we are building up a workshop for production and testing of our new products. We are searching for a highly motivated laborer to join our team in Mönchengladbach and contribute to the build-up and growth of our company. In this role, you will take up various supporting tasks in warehouses, production lines or other settings. We are looking for a General Laborer to take up manual labor tasks and support operations in worksites.

Responsibilities:

- Perform general maintenance tasks such as cleaning, sweeping, and tidying work areas.
- Assist skilled craftsmen (e.g., welders, electricians, etc.) with their tasks.
- Operate machinery or tools under supervision after appropriate training.
- Load, unload, and transport materials, tools, and equipment around the worksite.
- Assist in the delivery or movement of goods within the facility.
- Participate in assembly line work, when in a manufacturing setting.
- Follow instructions for product assembly or packaging tasks.
- Assist in various tasks as required, including painting, landscaping, or plumbing under supervision.

Requirements/ Qualifications:

- Ability to follow instructions and work well within a team.
- Basic understanding of safety procedures and adherence to safety protocols.
- Willingness to learn and adapt to different tasks and environments.
- High school diploma or equivalent; specific vocational training may be advantageous.
- English skill is necessary. German skill is preferred.
- Full time, on site at Mönchengladbach (Germany)
